Example of Biomass Power Waste-To-Energy Map

BIOMASS POWER & WASTE-TO-ENERGY MAP

Sent to 7,000+ Producers & Biomass Professionals

Biomass Magazine's 2028 U.S. Biomass Power & Waste-to-Energy Wall Map identifies proposed, under construction, idled and operational dedicated power plants—1 MW or greater—utilizing, or proposing to utilize, solid biomass fuel, including wood processing and forestry residues, C&D waste, ag residues, dedicated energy crops, and municipal solid waste (MSW and biomass plants separated in listings). Biomass and waste-to-energy plants are conveniently color coded by status for quick reference. Listings include facility name, owner, city, state, size (MW) and feedstocks.

Distribution

Mailed to 7,000+ facilities and industry stakeholders.

- All *Biomass Magazine* Subscribers
- Mailed to all biomass power and WTE plants
- All major biomass-related industry events

Following Industry Events:

1. International Biomass Conference & Expo (in bags)
2. Rcon
3. WasteExpo 2027
4. International Fuel Ethanol Workshop & Expo
5. Sustainable Fuels Summit: SAF, Renewable Diesel & Biodiesel

Actual Size: 40" x 29"
Premium Positions indicated in Turquoise
