North American Renewable Natural Gas Map

Sent to 7,000+ Producers & RNG Professionals

The 2028 North American Renewable Natural Gas Map, presented by the RNG Coalition and produced by *Biomass Magazine*, lists all renewable natural gas (RNG) facilities that are operating or under construction in the U.S. and Canada. Details of more than 200 projects on the data-rich, color-coded map include operational status, city, state/province, feedstock and RNG end use.
